The new ConBraze

With the new ConBraze-Series highest efficiency, effective use of materials and absolute functionality are optimally combined in the form of brazed plate heat exchangers. With these features the ConBraze-Series lives up to the expectations of the ever-increasing demand for environmentally friendly, energy-efficient cooling and heating systems, because both in the production and in the operation of these units resources are systematically saved. In addition, efficiency and durability have top spot.

New shaped flow cells generate higher turbulence in the channel and improve heat transfer, thereby increasing efficiency. Thus, the units are ideal for requirements of minimum space and maximum capacity.

Always a suitable solution at hand

The brazed plate heat exchangers from Kelvion offer tailor-made solutions for the widest range of application. We configure the most economically favorable model for you from the wide range of available sizes and the numerous optional features. We adapt this with individually positioned connections to meet your specific requirements.

Example:
- heat pumps for heating and potable water heating
- central domestic water heating
- home stations
- district heating stations

Your advantages at a glance:
- increased efficiency – increased performance
- higher compressive strength
- distinctive reduced filling volume
- reduced operating costs
GK...-Series: Specifications

- **plate material:** Stainless steel AISI 316L / 1.4404
- **brazing material:** Cooper

**Features**

- Safety Chamber™ (model 108H, 228H, 770M, 770H)
- Delta Injection™ (model 550H, 770H)

**Performance limits GKE**

- working temperature: -196°C to +200°C / -321°F to +392°F
- working pressure: up to 30 bar / 435 psi

**Performance limits GKS**

- working temperature: -196°C to +200°C / -321°F to +392°F
- working pressure: up to 40 bar / 580 psi

**Performance limits GKH**

- working temperature: -196°C to +200°C / -321°F to +392°F
- working pressure: up to 50 bar / 725 psi

**Approval**

- PED (CE)
- ASME VIII-1

*Also available as an advanced evaporator with a special “Delta Injection™” distribution system for the refrigerant inlet.*

We need following information to select your optimum heat exchanger:

- required temperature range
- flow rates or required heat load
- maximal permitted pressure drop
- required working conditions
